

**Amendments to the Specification**

Please amend paragraph [0034] of the application as follows:

[0034] If the touch location is not between the horizontal centers of two adjacent letters (302), then the touch location is between the horizontal center of a letter at the end of a row and the corresponding edge of the touchpad/touchscreen. In this case, the letter whose horizontal center is closest to the touch location and its adjacent letter are sent to the predictive text software module (306). For example, if the touch location is between the horizontal center of "Q" and the edge of the touchpad/touchscreen nearest to the letter "Q", then the letters "Q" and [{"Y"}] "W" will both be passed to the predictive text software module.
